

THREATCONNECT INTELLIGENCE

# Providing **Analyst-Curated Context** about Indicators

ThreatConnect Intelligence is a premium intelligence source focused on criminal and nation-state threats. Our in-house Research Team curates context around indicators and memorializes that knowledge over time. You can finally understand a threat actor's capabilities and attack patterns by seeing how a piece of information relates to a malicious campaign.

## **The end result? More signal, less noise.**

ThreatConnect Intelligence is so much more than a typical threat feed that delivers meaningless indicators with no context. Our Research Team invests numerous hours creating actionable intelligence that provides real insight for your organization, building out additional information about a threat from adversary activity, country of origin, phase of intrusion, and more. **We do the hunting so you don't have to.** With ThreatConnect Intelligence, you can finally stop scrambling for additional information and spend time focusing on how to best protect your organization.

## **Your Intel Just Got Exponentially Better**

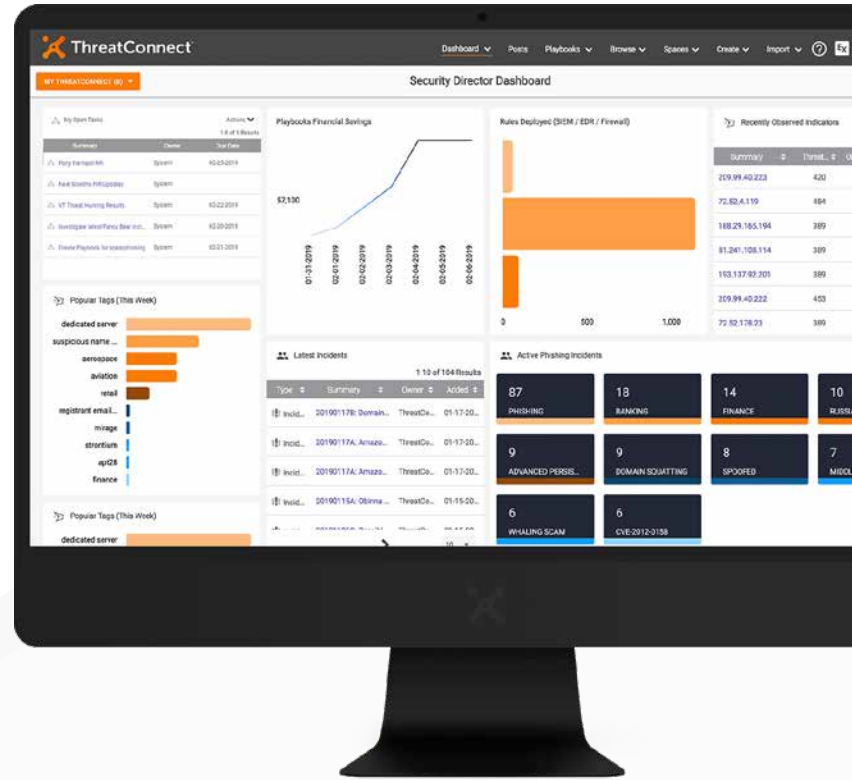

ThreatConnect's CAL™ (Collective Analytics Layer) provides a way to learn how many times potential threats were identified across all participating Platform instances. CAL anonymously leverages the thousands of analysts worldwide who use ThreatConnect.

## **Shift to a Proactive Defense with CAL Feeds**

Not only can CAL give you answers about intelligence you care about, CAL Feeds can tell you what's worth asking about. The initial four feeds (with plans to add more) help you to develop more actionable insights. With CAL Feeds, the immense dataset and analytics already found within CAL are paired with the tradecraft of our Research Team to identify pockets of intelligence that are fertile hunting grounds for teams of all sizes and maturity levels.

# ThreatConnect Intelligence includes:

- ✓ Cal Feeds
  - ✓ CAL Suspicious New Resolution IPs
  - ✓ CAL Suspicious Newly Registered Domains
  - ✓ CAL Suspicious Nameservers
  - ✓ CAL Suspected Ranking Manipulators
- ✓ Enriched indicators
- ✓ Context about the impacts on your particular organization
- ✓ Consolidated open source intelligence on adversaries
- ✓ Downloadable, shareable reports
- ✓ High-quality data about relevant threats
- ✓ Access to the expertise of the ThreatConnect Research Team
