

# ThreatConnect for Threat Intel Analysts

## Operationalize Your Threat Intelligence Operations

With ThreatConnect, easily operationalize your threat intelligence operations. Automate threat intelligence management, tasks, and processes like collection, analysis, and dissemination. Improve collaboration with other team members for faster decision-making.

Other benefits include:

### Maximize Actionable Insights With a Unified Threat Library

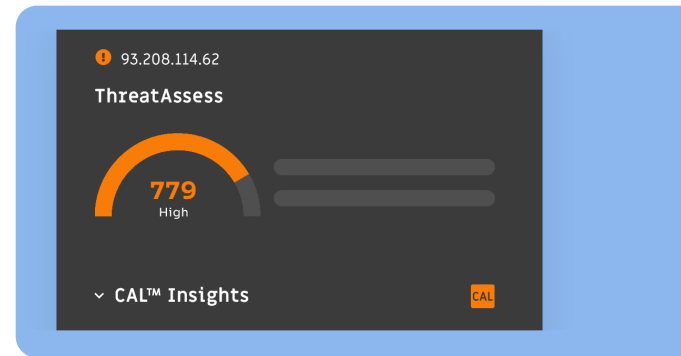

The Threat Library in the ThreatConnect Platform enables a single source of threat intelligence "truth". The Threat Library has a common data model that is flexible to your requirements and scalable to hundreds of millions of indicators. Threat intel is automatically normalized, de-duplicated and memorialized, making it ready to be used by Threat Intel Operations teams, and the rest of Security Operations.

### Any Framework - Any Analysis Methodology

Whether you use the Diamond Model of Intrusion Analysis, Lockheed Martin's Cyber Kill Chain, MITRE ATT&CK, or something entirely different, ThreatConnect will support you. Map important indicators of compromise (IOC) with key features such as tagging and customizable attributes. You're able to pivot between indicators and groups to spot patterns and tag indicators for easy organization and analysis.

### Advanced Analytics Engine

ThreatConnect's CAL™, our analytics engine, maximizes insights about threats by leveraging billions of anonymous data points from thousands of global ThreatConnect users to gain insight into the relevancy of threats. CAL further optimizes the efficiency of your

team by presenting the criticality of an IOC via our ThreatAssess scoring model, so they can make faster and better decisions and providing score cards on how open source intel sources are performing to prioritize the intel sources critical to your organization.

### Maximize Insights Into Threat Actors and Vulnerabilities Faster

Rapidly correlating data to understand relationships between indicators is critical for threat intel analysts. With ThreatConnect's Graph View, rapidly pivot from one indicator to another to quickly understand relational information and maximize insight into specific threat actors or vulnerabilities.

### Maximize Collaboration to Increase Intelligence Insight and Relevance

By encouraging information-sharing across your security teams, you'll establish a feedback loop that allows for increased threat intelligence insight and relevance to your organization. ThreatConnect supports various integration mechanisms like out-of-the-box integration apps to quickly connect your security tools to the Platform, native support for STIX and TAXII, and a flexible REST API when you need custom connectivity.

# An Example of ThreatConnect in Action

## How ThreatConnect Makes Operationalizing The Threat Intel Lifecycle Easier And Faster

Threat Intel Operations are dealing with big data challenges like other Security Operations teams. There are high volumes, coming in at high-speed, across a variety of external and internal sources, with varying degrees of value. The ThreatConnect Platform is optimized for making Threat Intel Analysts work faster, more efficiently, and with better collaboration to ensure Analysts can focus their efforts on the most critical threats and have the greatest impact to their organization.

## ● The ThreatConnect Platform

The cybersecurity environment continues to grow more challenging. Security teams are often overwhelmed by the constant stream of threats, and system vulnerabilities, against the backdrop of limited resources and immature processes.

The ThreatConnect Platform uniquely leverages risk insights and automation to help focus limited organizational resources on the organization's top priorities. The Platform operationalizes threat intelligence and knowledge to drive every decision and action faster to maximize impact with increased effectiveness, efficiency, better decision-making and strategic collaboration.

The benefits of the ThreatConnect Platform are clear - your security team will move from reactive to proactive engagement. Your team will better leverage risk insights and more effectively use threat intelligence and knowledge to drive better decisions and more effective action.

Reach out to learn how the ThreatConnect RQ can make you and your team more effective, decisive, and collaborative.

## ThreatConnect.

ThreatConnect enables threat intelligence operations, security operations, and cyber risk management teams to work together for more effective, efficient, and collaborative cyber defense and protection. With ThreatConnect, organizations infuse ML and AI-powered threat intel and cyber risk quantification into their work, allowing them to orchestrate and automate processes to get the necessary insights and respond faster and more confidently than ever before. Over 200 enterprises and thousands of security professionals rely on ThreatConnect every day to protect their organizations' most critical assets.
