

ThreatConnect Intelligence Anywhere

Put High-Fidelity Threat Intelligence Within Fast and Easy Reach

In cybersecurity, contextual data is important. Contextual data with speed becomes everything. Many cybersecurity teams are too far away from the critical information they need to make fast and accurate decisions.

ThreatConnect Intelligence Anywhere is a free browser extension for Chrome and Firefox. Intelligence Anywhere makes it simple to gain access to the knowledge in the ThreatConnect Platform from any web-based interface. It gives threat intel producers a fast and easy way to memorialize threat intel directly into the Threat Library. Threat intel consumers, like security operations analysts, can quickly access the critical intel relating to an Indicator or Group with a single click.

Maximize Insights and Efficiency with a Single Source of Truth

The Threat Library is the single source of threat intelligence “truth” for an organization. Being able to easily access this common repository of intel and knowledge on adversaries from any web-site or web-based console improves analyst efficiency and ensures everyone in the organization has access to the same insights.

Maximize Collaboration and Break Down Silos

Increase the value of your threat intelligence program by providing each member of the security team with a tool to access the knowledge in the ThreatConnect Platform. This knowledge then seamlessly integrates into their web-based security tool.

Adapt Faster Than Your Adversaries

Defenders must move from reactive to proactive. Threat intelligence teams can leverage ThreatConnect Intelligence Anywhere to move faster and capitalize on the organization's threat intelligence and knowledge. The speed of access to relevant and significant data improves collaboration across teams and decision making during investigations.

“ThreatConnect provides our security team with a bigger picture view and a better understanding of the threat landscape, so that they can better prioritize the actions they take to defend the enterprise.”

– Security Intelligence Team Lead, Financial Services Company ThreatConnect Customer

THE CHOICE OF THE GLOBAL 2000

Nearly 200 enterprises worldwide protect their organizations with ThreatConnect

workday.

GENERAL DYNAMICS
Information Technology

Key Capabilities Improve Time to Value

Natural Language Processing (NLP)

ThreatConnect Intelligence Anywhere automatically interprets and decodes specific MITRE ATT&CK techniques using native NLP.

CAL™ Automated Threat Library (ATL)

A CAL intel feed that aggregates, enriches, and analyzes more than 60 authoritative sources of threat intelligence.

CAL™ Insights

Leverage the global intelligence from CAL™, including classifiers from our analytics, global trends on observed indicators, and analyst insights from the ThreatConnect ecosystem.

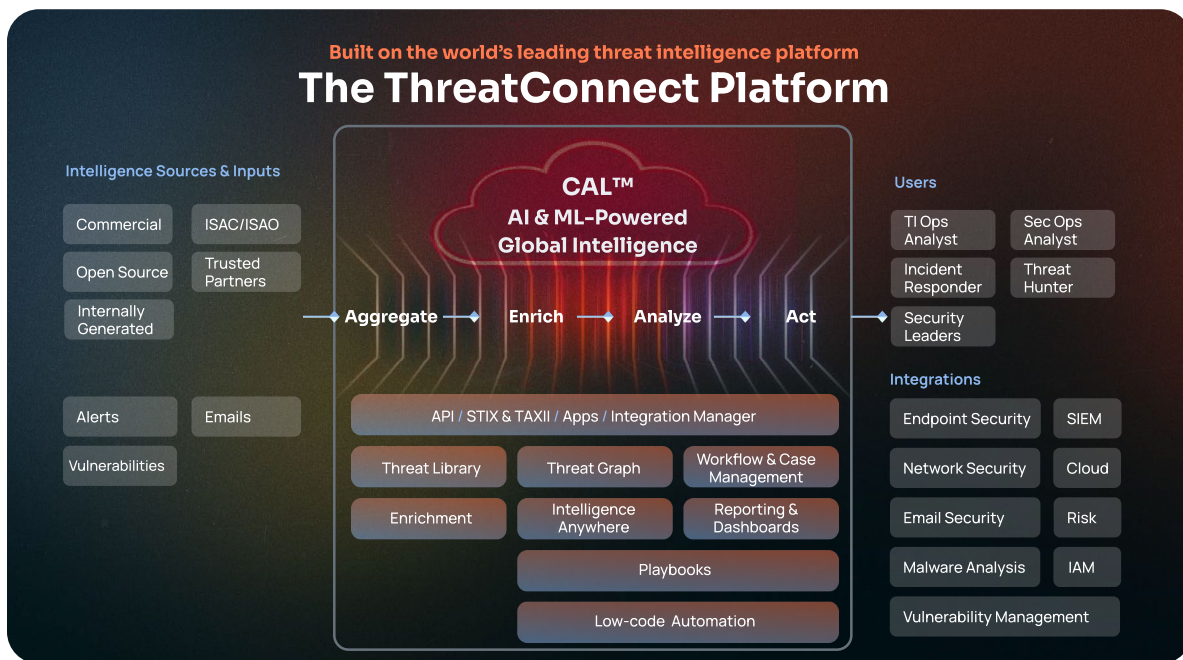

CAL™ Aliases

ThreatConnect CAL™ translates and disambiguates the aliases of threat actor groups, and extends this information to you in real-time via Intelligence anywhere allowing you to stop manually tracking threat actor group names in a spreadsheet.

Leverage the Power of the ThreatConnect Platform

The ThreatConnect Platform operationalizes threat intelligence and knowledge to drive every decision and action faster to maximize impact with increased effectiveness, efficiency, better decision-making and strategic collaboration.

The benefits of the ThreatConnect Platform are clear—your security team will move from being reactive, to being proactive, effectively using threat intelligence to drive better decision making and more effective actions.

ThreatConnect enables security operations and threat intelligence teams to work together for more efficient, effective, and collaborative cyber defense and protection. With ThreatConnect, organizations infuse threat intelligence and cyber risk quantification into their work, allowing them to orchestrate and automate processes to respond faster and more confidently than ever before. More than 200 enterprises and thousands of security operations professionals rely on ThreatConnect every day to protect their most critical systems. Learn more at www.threatconnect.com.
