

ThreatConnect ATT&CK Visualizer

ATT&CK Visualizer enables analysts to see attacker tactics and techniques, and identify adversarial behaviors. By leveraging the power of the MITRE ATT&CK Framework, ThreatConnect empowers analysts to quickly determine how to detect future attacks and take the necessary actions to prevent threats.

Simplify Threat Actor with ATT&CK Visualizer

Empower CTI, Offensive and Defensive Cybersecurity, and Cyber Risk Management

ThreatConnect ATT&CK Visualizer enables users to visualize commonly used techniques by threat groups within the MITRE ATT&CK framework. It aids users in seeing how these groups employ specific techniques, assess their prevalence, and gain valuable insights into their behaviors.

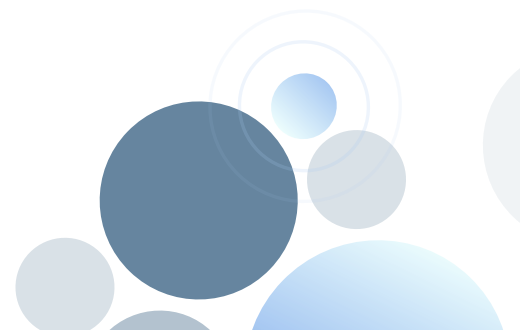

Maximize Insights and Efficiency

Using ATT&CK Visualizer and ATT&CK Tags, CTI teams can focus on high value activities, like analyzing intel, saving time and effort.

Use of ATT&CK Tags bolster efficiency and consistency in representing MITRE tactics and techniques within the ThreatConnect Platform. ATT&CK Visualizer allows users to easily see shared techniques among threat groups, while heat mapping aids in identifying and filtering for technique prevalence.

Enable Teams with a Common Language

ATT&CK Visualizer is a powerful tool that fosters collaboration across teams using the common language of the MITRE ATT&CK Framework. It enables teams to share insights, optimize defense strategies, and take proactive measures against threats.

Evolve Your Defense with ATT&CK Visualizer

Establish a Common Language

A shared language enables the organizing and communicating of defense strategies. This alignment empowers security teams to collaborate efficiently and maximize effectiveness in threat intelligence operations.

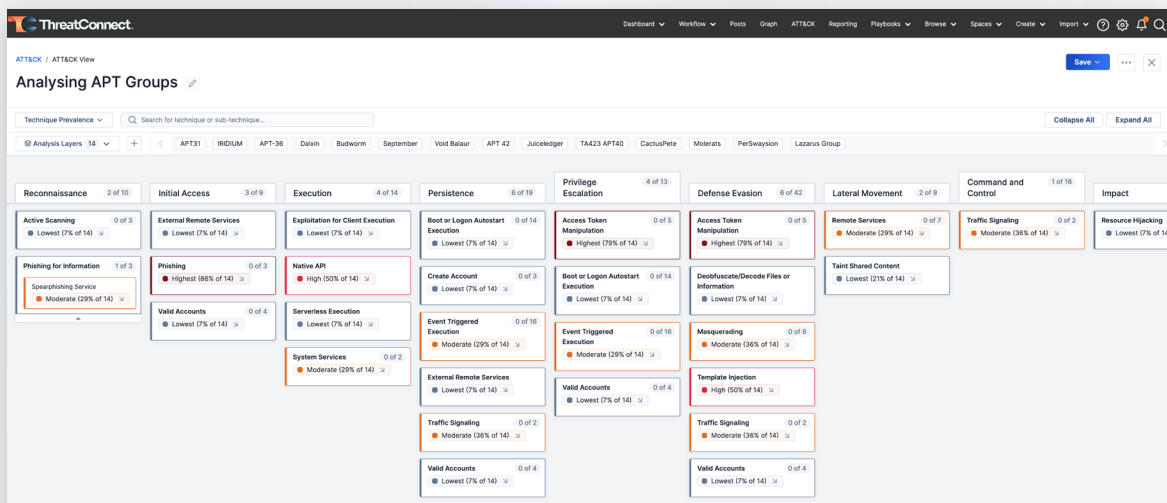

Visualize Threats, Prioritize Defenses

ATT&CK Visualizer aids CTI analysts in aligning their defense priorities. It enables a concentrated focus on the prevalent tactics and techniques employed by threat groups and security coverage mapping to identify gaps or over-investments so that resources are directed where they are essential.

Furthermore, the TI Ops platform tagging capability enables you to use ATT&CK tags to generate precise intelligence about the latest tactics, techniques, and procedures. Analysts can generate custom views, group threat actors, and produce heat maps of prevalent techniques.

Focus on and Share What's Important

Easy-to-use features within ATT&CK Visualizer include adding and removing analysis layers to identify similarities between various groups more quickly and exporting custom views as JSON files to share more easily with stakeholders.

ThreatConnect

ThreatConnect enables threat intelligence operations, security operations, and cyber risk management teams to work together for more effective, efficient, and collaborative cyber defense and protection. With ThreatConnect, organizations infuse ML and AI-powered threat intel and cyber risk quantification into their work, allowing them to orchestrate and automate processes to get the necessary insights and respond faster and more confidently than ever before. Over 200 enterprises and thousands of security professionals rely on ThreatConnect every day to protect their organizations' most critical assets. Learn more at www.threatconnect.com.
