# POLARITY
BY ThreatConnect.

Polarity Enterprise by ThreatConnect

Federated search, correlation, and analysis for security data, threat intel, and workflow management systems. Operational security teams can access, analyze, and correlate all sources of intelligence, data, and knowledge in one place, regardless of where the data is stored or shared – enabling faster, more precise response.

Without Polarity

With Polarity

Single Search across all systems

The Benefits of Polarity Enterprise

◆ **Real-Time, Contextual Intelligence** – Leverage a real-time overlay that provides in-context intelligence across your critical security tools, such as SIEMs, SOARs, EDRs, and ticketing systems.

◆ **Faster Response Times** – Reduce the time it takes to detect, prioritize, and respond to incidents by providing analysts with timely and actionable intelligence directly in their workflow.

◆ **Seamless Operational Integrations** – Integrate data from operational tools including SIEMs, SOARs, and EDRs, allowing analysts to take immediate action based on enriched and contextualized data without switching between platforms.

◆ **Custom Integrations and Playbook Automation** – Leverage interconnected systems and playbooks to automate repetitive tasks and create custom integrations tailored to your security environment, enabling faster and more efficient workflows.

◆ **AI-Powered Insights** – Improve efficiency using enterprise-approved GenAI solutions, delivering AI-driven summaries and insights directly into analysts' existing workflows.

Search Across SIEMs, SOARs, EDRs, Threat Intel & More without Leaving Your Pane of Glass

Polarity Enterprise integrates directly into operational security workflows, providing the essential features security teams need to access, contextualize, and act on the knowledge and data available to them. With support for both cloud and on-premises deployments, Polarity Enterprise empowers teams with real-time intelligence across SIEMs, SOARs, EDRs, and more—bringing actionable insights wherever and whenever analysts need them. They can effectively harness knowledge to take decisive action to outmaneuver evolving threats.

Increase Efficacy Across the Entire Cybersecurity Organization

Polarity connects to intelligence in the ThreatConnect TI Ops platform and turns it into actionable, real-time data that recognizes and contextualizes literally any data your analysts are working with - without any setup. That's clear, concise intelligence in real-time without needing to log into another tool, write a custom script, or maintain complex and costly data lakes. Pairing TI Ops and Polarity means that *the intel your team is producing gets used, operational teams can leverage it, and the entire organization can reduce false positives, improve response times, and stop more threats before they become breaches.*

Unique Global Intelligence Insights with ThreatConnect CAL

ThreatConnect CAL™ offers ground-truth insights from cybersecurity teams across the globe, such as reported false positives, measures of analyst interest and real-world observations, malware classification, DNS, historical geolocation, and more. It also brings in data from more than a hundred public cybersecurity blogs and government bulletins and turns them into actionable machine- and human-readable threat intelligence, classified by AI into searchable categories like industry, ATT&CK techniques, software impacted, and geography.

Easily Operationalize Threat Intelligence

Polarity Enterprise removes barriers to using threat intelligence across security operations teams by making it available wherever your team works and then leveraging GenAI to summarize those insights to make them easy to digest and action. It also makes CTI research, analysis, and capture work quicker and easier.

What Customers are Saying

"It took a 2-5 min task and turned it into a 2 second task."

"This tool saves 'humans' worth of time and helps us get more utilization."

"Polarity enables fusion of cross-source and cross-team data and insights."

Amplify Your Security Operations and Threat Intelligence

To learn more about Polarity, please connect with us via chat on threatconnect.com, request a demo at threatconnect.com/request-a-demo, or email sales@threatconnect.com.
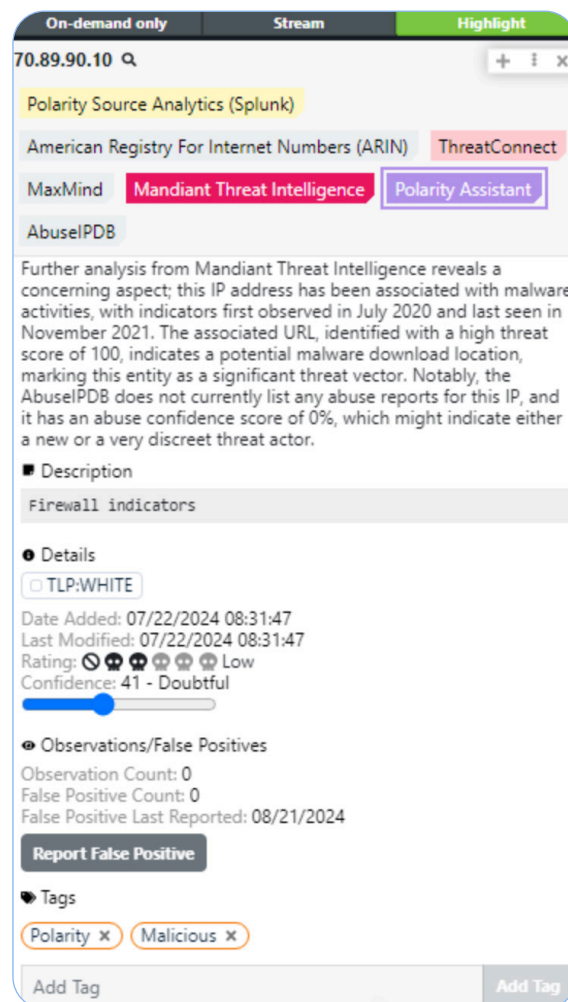

Interactive AI summaries make it easy for SecOps analysts to understand exactly what they're looking at, whether it's a threat, and what to do about it.

About ThreatConnect

ThreatConnect enables threat intelligence operations, security operations, and cyber risk management teams to work together for more effective, efficient, and collaborative cyber defense and protection. With ThreatConnect, organizations infuse ML and AI-powered threat intel and cyber risk quantification into their work, allowing them to orchestrate and automate processes to get the necessary insights and respond faster and more confidently than ever before. More than 250 enterprises and thousands of security professionals rely on ThreatConnect every day to protect their organizations' most critical assets.
