

ThreatConnect and Recorded Future

Enhance Attacker Insights and Defenses

The Challenges

Knowing which adversaries are targeting your organization's attack surface is vital to ensure adequate threat defenses and detections are in place. Attackers, like ransomware gangs and nation-states, are looking for entry points into an organization and will abuse any exposure they find to achieve their goals.

Why ThreatConnect + Recorded Future

Integrating Recorded Future's threat intelligence solutions into the ThreatConnect Threat Intelligence Operations (TI Ops) Platform gives cybersecurity teams an unfair advantage against adversaries.

The integration with Recorded Future's Threat Intelligence, SecOps Intelligence, and Vulnerability Intelligence ingests Domain, Hash, IP, URL, and Vulnerability Risk List entities, as well as Insikt Group Analyst Notes. This intel is aggregated with your other intel data in a Unified Threat Library, making it easy to achieve a variety of use cases efficiently and effectively.

Key Benefits

- ♦ Gain broader visibility of the threat landscape
- ♦ Enhance operational, tactical, and strategic intelligence deliverables
- ♦ Improve threat detection, prevention, and incident response
- ♦ Comprehensive contextual threat intel sourced directly from Insikt Group reports.

Get Results with ThreatConnect + Recorded Future

The integration makes it quick and easy to add Recorded Future intelligence to the TI Ops Platform through the power of our Threat Intelligence Engine.

Unified Threat Intelligence

Marry your existing threat intelligence with Recorded Future to get a more comprehensive view on the threat landscape and supply high-fidelity intel to stakeholders.

Threat Detection and Prevention

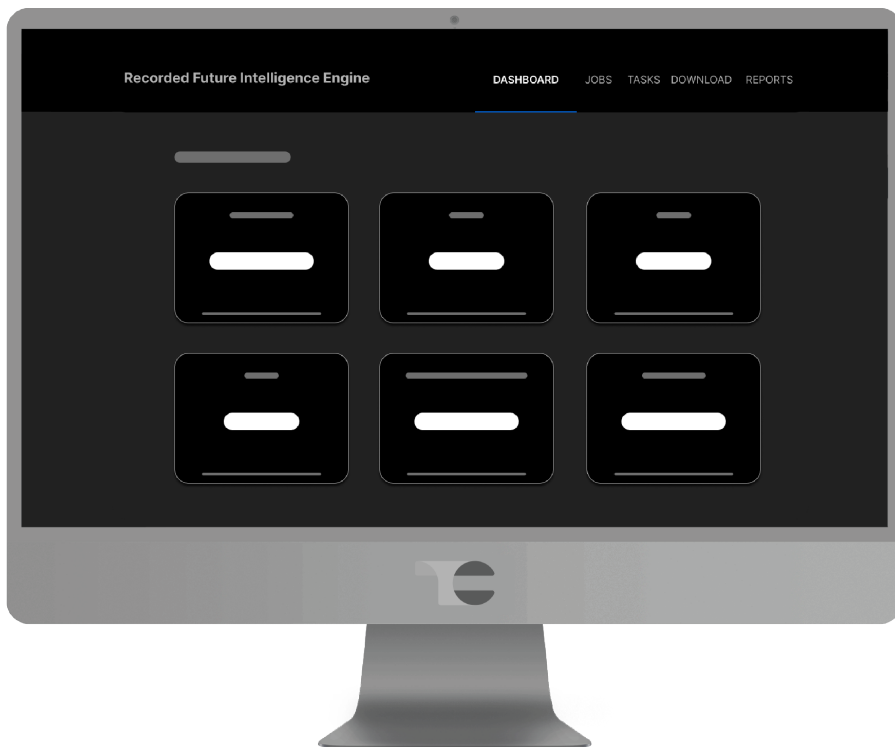

Enhance the detection and blocking effectiveness of your security tools. Prioritize alert triage and analysis activities.

Vulnerability Prioritization

Improve risk-based vulnerability analysis to focus on the ones that are most critical to your organization.

Generating Strategic Intelligence

Give leaders and executives the needed intelligence to make precise, strategic decisions to improve organizational cyber defenses.

How to Get Started

The Recorded Future Intelligence Engine App can be found in the ThreatConnect App catalog in the Platform.

Reach out to one of our experts at <https://threatconnect.com/request-a-demo/> to learn more about the integration and its benefits.

ThreatConnect enables threat intelligence operations, security operations, and cyber risk management teams to work together for more effective, efficient, and collaborative cyber defense and protection. With ThreatConnect, organizations infuse ML and AI-powered threat intel and cyber risk quantification into their work, allowing them to orchestrate and automate processes to get the necessary insights and respond faster and more confidently than ever before. More than 200 enterprises and thousands of security professionals rely on ThreatConnect every day to protect their organizations' most critical assets.
