

# ThreatConnect ArcSight Enterprise Security Manager (ESM) Integration

Use Validated Threat Intelligence to  
Easily Spot Trends and Patterns

ThreatConnect® and Micro Focus have partnered to enable users to detect and act on ThreatConnect intelligence in ArcSight Enterprise Security Management (ESM)™.

This integration allows users to combine validated Threat Intelligence in ThreatConnect with their aggregated internal logs from ArcSight ESM.

Users can easily spot trends or patterns that are out of the ordinary and act on them efficiently.

## The Challenge

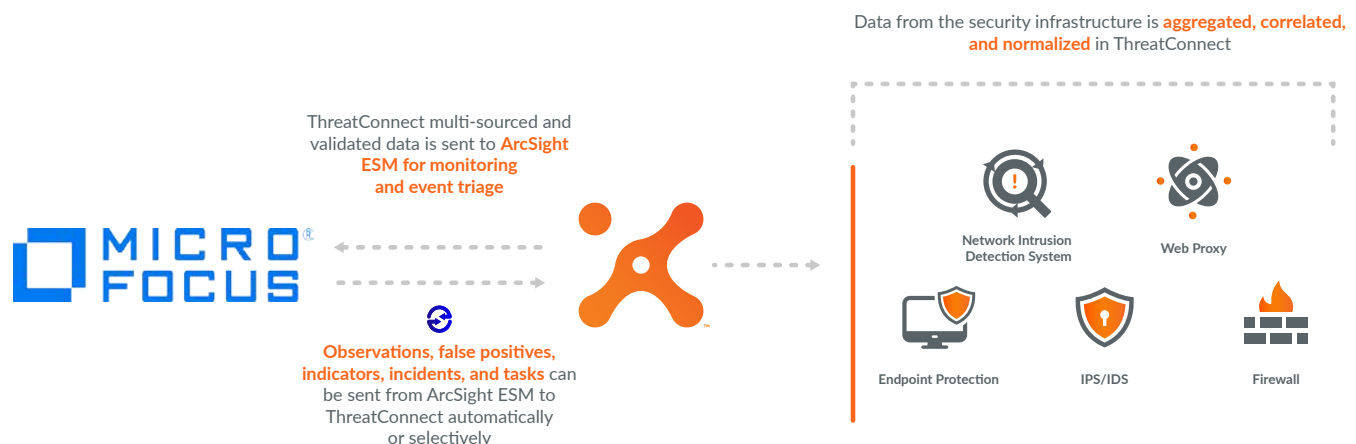

**Organizations of all sizes suffer from fragmentation in their security operations.**

When security teams don't collaborate and tools don't communicate, critical gaps emerge. By making ThreatConnect intelligence data available in ArcSight ESM, you are able to build rules and alerts to identify the most relevant threats, proactively protect your network, and quickly respond to incidents in a measurable way.

## The Solution

**The integration ensures validated and actionable intelligence is being sent from ThreatConnect to ArcSight ESM.**

First, intelligence from ThreatConnect is sent to ArcSight ESM for monitoring. Then, the additional context provided by ThreatConnect enables the security team to act more efficiently when reviewing alerts. Lastly, this bi-directional integration allows you send data back to ThreatConnect or trigger ThreatConnect Playbooks from within ArcSight ESM.

# Features & Benefits

Sends all available threat data from ThreatConnect into ArcSight ESM for validated alerting

Enables real-time threat analysis and indicator correlation

Allows you to launch ThreatConnect Playbooks directly from ArcSight ESM

Automates the detection of advanced threats

Provides the necessary context to be able to take action on the indicators

Ensures that you are sending validated threat intelligence to ArcSight ESM

## How to Get Started

If you are a ThreatConnect customer, contact your Customer Success Representative for more information.

If you are not a customer and would like to learn more about this integration or see a demo of the ThreatConnect Platform, please contact [sales@threatconnect.com](mailto:sales@threatconnect.com).

Designed by analysts but built for the entire team (security operations, threat intelligence, incident response and security leadership), ThreatConnect's intelligence-driven security operations platform is the only solution available today with intelligence, automation, analytics, and workflows in a single platform. Centralize your intelligence, establish process consistency, scale operations, and measure your effectiveness in one place. To learn more about our threat intelligence platform (TIP) or security orchestration, automation, and response (SOAR) solutions, visit [ThreatConnect.com](https://ThreatConnect.com).
