

ThreatConnect Dashboards

Gain insight and situational awareness into what's important to you and your organization.

Easily visualize data that shows the impact of your security efforts and gain a better understanding of the threats your organization faces. Automatically monitor your security operations and intelligence in a way that is actionable and meaningful for you and your team. View, edit, or create custom dashboards to track the metrics that will inform critical decision-making for your security operations.

With Dashboards you can:

- Choose from pre-built dashboards to view the data that is most critical and useful for your team, to monitor the most urgent security operations needs, or to get more direct insight from your intelligence source
- Monitor recent history, open tasks, active incidents, observations, false positives, and more with pre-built and configurable cards
- Easily drill down from charts and datatables to dig deeper into more specific information
- Clearly articulate impact and actionable insights by presenting your data in the most effective formats including sparklines, bar charts, tree maps, and datatables

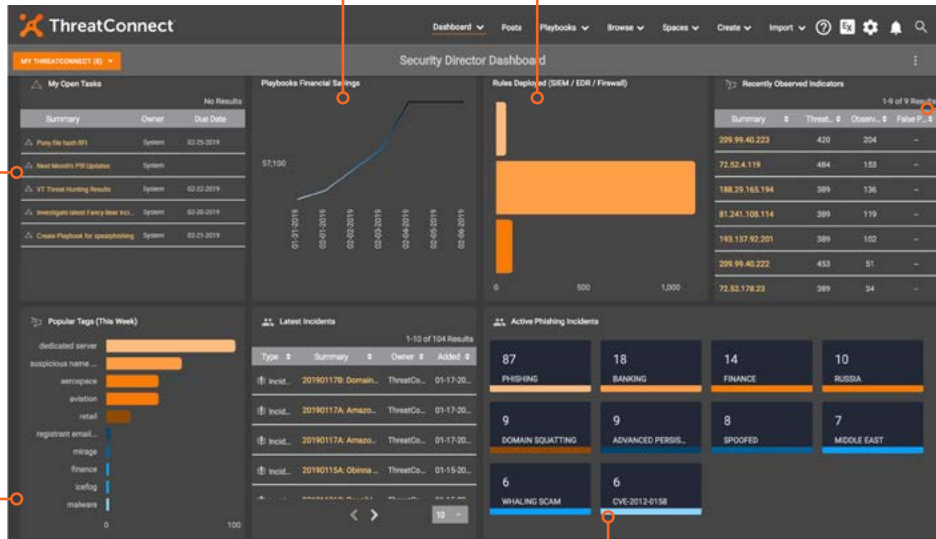

Whether you're working in threat intelligence, security operations, incident response, or on the security leadership team- you can build insightful and unique dashboards to meet your specific needs. Configuring multiple dashboards allow for flexibility depending on current priorities and the ability to easily share them with others in your organization.

Quickly view ROI data for instant look into cost savings

Add custom metrics based on data from inside and outside ThreatConnect

Easily evaluate your intelligence to determine priorities

Keep track of open tasks and new notifications to stay aware of required actions

Drag and resize dashboard cards to prioritize how you view information

Monitor all activity in one view for quick status checks
