ThreatConnect

ThreatConnect & Fidelis Cybersecurity

Fidelis Cybersecurity

ThreatConnect® and **Fidelis Cybersecurity** have partnered to provide users with ThreatConnect intelligence for use within Fidelis Network™. This integration allows automatic synchronization of ThreatConnect indicators to Fidelis Network, enabling users to easily — and quickly — investigate current and historic network activity for the latest threats.

The Challenge

Cybersecurity teams work continuously to protect their networks from a constant influx of malware, vulnerability exploit attempts, and data exfiltration.

Analysts are overwhelmed with the sheer number of alerts triggered by their security tools as they monitor ever increasing amounts of data flowing in and out of their networks. As a result, they're not able to quickly identify real threats from the noise and ultimately respond before a breach occurs.
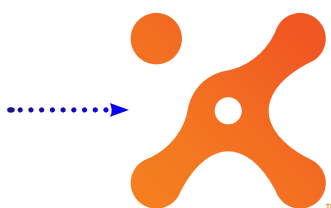

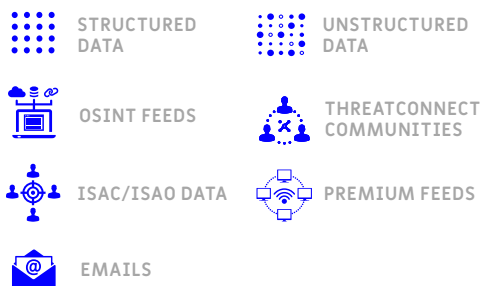

The Solution

ThreatConnect and Fidelis combine ThreatConnect's exclusive threat intelligence with Fidelis Network's Deep Session Inspection® technology to produce high-quality alerts, providing you with the ability to:

✓ Ingest the latest threat data from multiple sources, correlate it, and enrich it in ThreatConnect

✓ Automatically synchronize validated threat data from ThreatConnect to Fidelis Network for alerting

✓ Match against real-time network flows and historic metadata in Fidelis Network

✓ Search through historic metadata to look for events that happened in the past

---

Ingest threat data from multiple sources

Correlate, normalize, and enrich threat data in ThreatConnect

Send validated threat intelligence to Fidelis Network for alerting

Features & Benefits

Prioritize feeds you want to send to Fidelis Network

Instantly shows matches, both current and historic

Users have full control of which ThreatConnect indicators are sent to Fidelis Network

How to Get Started

If you already have a ThreatConnect Basic, Team or Enterprise account, contact your Customer Success Engineer for information on how to integrate with Fidelis.

For more information on ThreatConnect integration with Fidelis, or any of our other 70+ security integrations, please contact **sales@threatconnect.com**.

ABOUT FIDELIS CYBERSECURITY

Fidelis Cybersecurity protects the world's most sensitive data. We reduce the time it takes to detect attacks and resolve security incidents. With Fidelis you'll know when you're being attacked, you can retrace attackers' footprints and prevent data theft. To learn more about Fidelis Cybersecurity products and incident response services, visit www.fidelissecurity.com and follow us on Twitter @FidelisCyber.

 ThreatConnect

Designed by analysts but built for the entire team (security operations, threat intelligence, incident response and security leadership), ThreatConnect's intelligence-driven security operations platform is the only solution available today with intelligence, automation, analytics, and workflows in a single platform. Centralize your intelligence, establish process consistency, scale operations, and measure your effectiveness in one place. To learn more about our threat intelligence platform (TIP) or security orchestration, automation, and response (SOAR) solutions, visit ThreatConnect.com.
