

ThreatConnect McAfee Enterprise Security Manager Integration

Use Validated Threat Intelligence to Easily Spot Trends and Patterns

ThreatConnect™ and McAfee® have partnered to enable users to detect and act on ThreatConnect intelligence in McAfee Enterprise Security Manager™. This integration allows users to combine validated Threat Intelligence in ThreatConnect with their aggregated internal logs from McAfee ESM. Users can easily spot trends or patterns that are out of the ordinary and act on them efficiently.

The Challenge

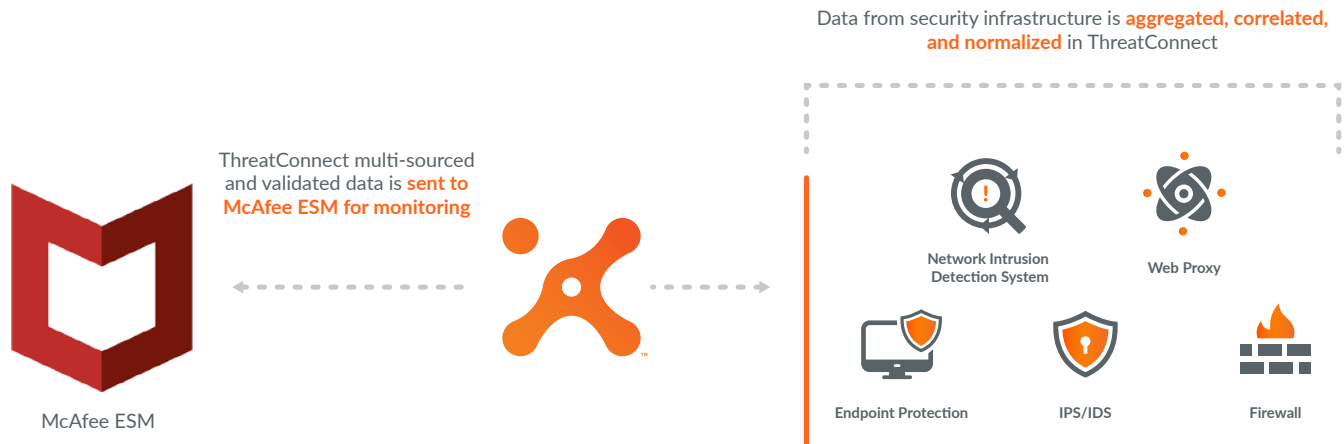

Organizations of all sizes suffer from fragmentation of their security operations.

When security teams don't collaborate and tools don't communicate, critical gaps emerge. By making ThreatConnect intelligence data available in McAfee Enterprise Security Manager (ESM), you're able to build rules and alerts to identify the most relevant threats, proactively protect your network, and quickly respond to incidents in a measurable way.

The Solution

The integration ensures validated and actionable intelligence is being sent from ThreatConnect to McAfee ESM.

First, intelligence from ThreatConnect is sent to McAfee ESM for monitoring. Then, the additional context provided by ThreatConnect enables the security team to act more efficiently when reviewing alerts.

Features & Benefits

Sends all available threat data from ThreatConnect into McAfee ESM for validated alerting

Provides the necessary context to be able to take action on the indicators

Enables real-time threat analysis and indicator correlation

Automates the detection of advanced threats

Ensures that you are sending validated threat intelligence to McAfee ESM

How to Get Started

If you are a ThreatConnect customer, contact your Customer Success Representative for more information.

If you are not a customer and would like to learn more about this integration or see a demo of the ThreatConnect Platform, please contact sales@threatconnect.com.

Designed by analysts but built for the entire team (security operations, threat intelligence, incident response and security leadership), ThreatConnect's intelligence-driven security operations platform is the only solution available today with intelligence, automation, analytics, and workflows in a single platform. Centralize your intelligence, establish process consistency, scale operations, and measure your effectiveness in one place. To learn more about our threat intelligence platform (TIP) or security orchestration, automation, and response (SOAR) solutions, visit ThreatConnect.com.
