

ThreatConnect McAfee Enterprise Security Manager Integration

Use Validated Threat Intelligence to Easily Spot Trends and Patterns

ThreatConnect® and Intel Security have partnered to enable users to detect and act on ThreatConnect intelligence in **McAfee Enterprise Security Manager™**. With this integration, users can aggregate their internal logs and combine them with validated threat intelligence, to easily spot trends or patterns that are out of the ordinary and act on them efficiently.

The Challenge

Organizations of all sizes suffer from fragmentation of their security operations.

When security teams don't collaborate and tools don't communicate, critical gaps emerge. By making ThreatConnect intelligence data available in McAfee Enterprise Security Manager (ESM), you're able to build processes to identify the most relevant threats, proactively protect your network, and quickly respond to incidents in a measurable way.

The Solution

The integration helps make sure validated and actionable intelligence is being sent from ThreatConnect to McAfee ESM.

First, your aggregated logs move from McAfee ESM and are combined with your threat intelligence in ThreatConnect. ThreatConnect provides context with the indicators, and enables your security team to easily spot out-of-the-ordinary trends or patterns, and act on them efficiently.

Features & Benefits

Sends all available threat data from ThreatConnect into McAfee ESM for validated alerting

Provides the necessary context to be able to take action on the indicators

Enables real-time threat analysis and indicator correlation

Automates the detection of advanced threats

Ensures that you are sending validated threat intelligence to McAfee ESM

How to Get Started

If you already have a ThreatConnect account, contact your Customer Success Engineer for information on the integration.

For more information on ThreatConnect integrated with McAfee ESM, or any of our other 70+ security integrations, please contact sales@threatconnect.com.

ABOUT THREATCONNECT

ThreatConnect, Inc.® unites cybersecurity people, processes and technologies behind a cohesive intelligence-driven defense. Built for security teams at all maturity levels, the ThreatConnect platform enables organizations to benefit from their collective knowledge and talents; develop security processes; and leverage their existing technologies to identify, protect and respond to threats in a measurable way. More than 1,200 companies and agencies worldwide use ThreatConnect to maximize the value of their security technology investments, combat the fragmentation of their security organizations, and enhance their infrastructure with relevant threat intelligence.
