Threat Intelligence, Analytics, and Orchestration in One Platform

THREATCONNECT

Today's adversaries are smart. When security teams don't collaborate and tools don't communicate, critical gaps emerge. They know how to exploit these vulnerabilities to compromise your business' and your customers' data. That's where we come in.

The ThreatConnect Platform empowers you to find cyber threats, evaluate risk, and mitigate harm to your organization. It was specifically designed to help you understand adversaries, automate workflows, and mitigate threats faster using threat intelligence. But we know threat intelligence isn't one size fits all. That's why we offer a suite of products **designed for teams of all sizes and maturity levels**.

TC IDENTIFY

Intelligence Delivered with ThreatConnect

Perfect for teams just getting started or large organizations that are looking for threat intelligence focused on targeted attacks and crimeware.

TC MANAGE

Intelligence-Delivered Orchestration

Great when you don't have a dedicated TI team. Automate part or all of your processes for managing threat data and send it to your defensive tools for action.

TC ANALYZE

Threat Intelligence Platform (TIP)

Built for analysts by analysts. Enrich threat data and create intelligence to give your team insights to prioritize and hone their efforts.

TC COMPLETE

Security Operations and Analytics Platform

Designed for the team that wants it all. Analyze, hunt, create, and take action on threat intelligence with custom apps, Playbooks, and more.

THREATCONNECT OFFERS FOUR PRODUCTS THAT HELP YOU:

- ✔ Gain visibility into threats and understand their relevance
- ✔ Be more efficient with automation, task management, and orchestration
- ✔ Manage risk with strategic intelligence and proactive threat hunting
